Mac OS 10.10 is coming and all developers are waiting for it! When it will be released, you are going to see a lot of new functionalities, as well as fresh app icons and styles. One of the new OS X features is a new set of icons and app designs that are called the Material Design icons. As you can see, these icons have a more natural look, something that is referred to as material look. The design process for this iconic set of icons was inspired by the metallic effects used in many iOS apps. Thus, to create the Material Design icons we had to draw inspiration from the iPhone,

iPad and Apple Watch, as well as some other iPad apps. Movie Icon Pack 12

The main difference between the original design icons and the icons that come with Movie Icon Pack 12 is that we made changes to the icons that represent the analog watches, changing the color scheme to fit with the color of the screen. We also added some new themes, bringing an upgrade look that you will definitely like. The icons that come with this icon pack are high-quality images that are packed in one convenient file, which allows you to display a large number of designs in a single directory. Thus, you will be able to add a touch of new style to any

application that is hosted in a dock.
