Go to tools and open the file tool. The tool will be opened and you can see Autocad v16.2 patch file. Click on the file. Save the file on desktop or any other desired location. Do the same with every patch available at Autodesk's website. Go to installation directory, for Autocad 2016 this is C:\Program Files\Autodesk\AutoCAD\2016. Open the Command Prompt in the installation directory. Type cd Autocad2016/installer. Go to where the patch files are saved. In my case this is C:\Users\your username\Desktop\Autocad 2016 Patch Files. Type patch and hit Enter. That's all. Now you can run Autocad v16.2. Just open the program from the installation directory and it will run.

The 1.2.5.2.0 N-glycan profile of TTR variants. The 1.2.5.2.0 N-glycan profile of seven novel variants of TTR was determined. The variants included five causative variants of familial amyloidotic polyneuropathy (FAP), TTR Glu33Lys, TTR Val30Leu, TTR Val111Ala and TTR Val111Leu and two variants that are associated with familial amyloidotic cardiomyopathy (FAC), TTR Met30Ala and TTR Val71Leu. The structure of each variant was defined as part of a larger structure in order to define the relative abundance of all glycans. The profile of these variants showed that they share similar and characteristic N-glycosylation patterns. Of the variants examined, TTR Glu33Lys and TTR Val111Ala, the former predominantly bearing the glycoform, (1-->6)-fucosyl-difucosyl-biantennary (Fuc-DF-Bi), and the latter predominantly bearing the glycoform, (1-->6)-fucosyl-difucosyl-trisialosyl-biantennary (Fuc-DF-TriS-Bi), the others predominantly bearing the glycoform, (1-->3)-fucosyl-difucosyl-bisialosyl-biantennary (Fuc-DF-BiS-Bi).
