“The technology we are bringing to FIFA has the potential to fundamentally change the way the game is played,” said Matthias Hözl, Co-Founder of Sense. “In our research we compared FIFA games from the past with professional clubs from the present day. The difference in game mechanics and strategies between the two games is clearly visible. And we want to bring that to FIFA.” The motion capture data is integrated into FIFA 22 by using it to power pitch animations, player movements, ball physics and interactions with the ball. The data collected from a player’s actual movements is also used to power things like their sprint and acceleration, as well as movements used to communicate to teammates during a game. “We have a world class team of people at EA Sports behind-the-scenes working hard to make FIFA 22 the best football game of all time. Bringing ‘Hyper Motion’ to FIFA is a key component of that, as it enables the technology we have built at Sense to impact the game in an exciting and unique way,” said Patrick Söderlund, Executive Vice President, Marketing at EA SPORTS. FIFA 22 on PS4 includes all the coverstar players on PlayStation 4. EA SPORTS players will have access to all the coverstars on Xbox One and PC. The Champions League, FA Cup, Europa League and Europa League Qualifiers are all returning. FIFA Ultimate Team has updated and improved play and scoring. Major goalkeepers will get legendary status for winning certain Champions League trophies, their FUT ratings will change, and there will be improved functionality for managers to switch between goalkeepers quickly. The new “Celebrate the World Cup” mode will deliver new ways to interact with the World Cup, including an enhanced World Cup schedule, curated World Cup events, new rewards and more. EA SPORTS has also added that users will be able to replay the competitions of each year of the World Cup in FIFA Ultimate Team. The Ultimate Team Cup, which will return this year, will have new automated tools to help players organize their dream squads, ensure their dream teams are balanced and compare players across teams in real time. FIFA 22 will launch on PS4 and Xbox One on Oct. 15. For more information on FIFA, please visit www.eap.ea.com.The specific objectives of the study are: (1) to establish a collaborative network

Create your very own FUT squad by combining real-world players and real-world team badges in this newly revamped pack. This pack also includes new ways to earn FIFA points throughout the year, so you can speed your FUT journey. Mobile - The new FIFA mobile app delivers an enhanced gameplay experience and brings the popular The Journey feature to life, allowing you to build and launch your club as you build your soccer lifestyle. MAJOR TECHNICAL IMPROVEMENTS New Decision Making - A major overhaul of the camera system, which introduces our next-generation match prediction engine that makes the ball behave more realistically throughout the pitch. Over 750 decisions have been made to ensure the ball reacts to the new physics engine. Class-Specific AI Play - The all-new AI system will simulate each team's distinct individual style, play style and set of rules. All new strategic layers that allow the game to react according to each team's strengths, weaknesses and tactics. Players will also react with different body language in different situations; why run towards the sidelines when in possession and why use a specific pass? Futures for No Man's Sky - Only available in this pack Tactics and Motion - Unlock nearly 200 new and updated player and team-specific tricks and techniques, including new attacking and defensive patterns to manipulate the game and unblock passes. With updated animations, including that of the ball, new collision physics, and even more ragdoll effects, ball physics have been greatly improved. Players can also now sense the urgency of a match and dynamically run out of time, like your opponent does, meaning they will not be able to spend every second of a match changing position. Virtual Trainer - Added the experience of virtually working with a professional technical director to fine-tune your game and get the most out of FIFA 22. PITCH OBJECT 3D GRAPHICS We will introduce you to the new Pitch object 3D graphics: with this new feature, the game will be able to dynamically react to the movements of the ball, resulting in an intense and immersive experience. What does this mean for you? It means, you will never have to say goodbye to those devious shots from over the wall again. The players will also react much more realistically to the ball, and will be able to run across the pitch and trap the ball in their own half of the pitch without the need for a blocker. The 3D
