**Huge ass monsters come out of the shadows [Characters][Characters] [Character Update] ► CYPHER will be available from March 4th until March 22nd as the newest recruit. ► What are some of the reasons for this decision? This is a decision that the team has been discussing and thinking about for quite a while. Cipher does not have a large amount of experience with RPGs, so there are problems that need to be taken into consideration with regard to character development. I want to ensure that the characters are interesting, and that they cannot be thought of as only being powerful. These are the issues that we have to deal with because we are new to this, but we have been listening to your feedback and suggestions. Cipher's design concept is to create a character that has the strength and power of a general, but the development of a character is slow, and it is a process that takes time. In order to create a character that changes and grows from the start, we have planned out a number of steps that will be necessary. These have not changed, but Cipher will be putting in a lot of effort, and a lot of time, into creating the character that will be receiving the most amount of attention. We'd like to apologize in advance to those who want to buy Cyanide shares on March 4th. ► Are there plans to incorporate the Cybrog experience elements? We are not entirely closed to the possibility. After having the character created, and the story written, we will be analyzing the game and deciding whether or not to incorporate the elements we have incorporated into our previous RPGs, such as the Cybrog experience. We are currently not sure if we will be able to include all of those elements in the game, but we are thinking it over. We will be making the necessary adjustments after we have analyzed how the game is going. ► In the event that the Cybrog experience does appear in the game, what would be the approximate amount of time that it will take for players to see it? It is not something that we can answer. We have to take the various opinions, and because the amount of Cybrog experience in the games that we have worked on is quite different, it is extremely difficult to put an estimate on it. It will be something that we will take into account when the game is complete. ► What are some of the reasons for this decision? As we've said,**

### What's new:

**After buying this game from the WotEshop I downloaded it and found a logical bug. If I go to NPC > Inventories, it keeps on refreshing the screen (I have a 30 KTP PC). The game keeps on loading the inventories and the characters instead of staying at the login screen. So that I had to restart to fix it. The Good: I liked the good graphics of the game. The minimalistic interface. And the colors were well balanced. The Bad: I had a major problem that the game was unable to start (loading screen could never clear). Report this game Saw this one for the first time and loved every aspect of it. A solid RPG that doesn't take its time to tell its story, instead moving you along and demanding to know from you next or what you think will next unfold. And in addition it has an ultra combo based on parries and dodge in addition to regular attacks. One of my favorite games of all times. The Good: Sweet combat mechanics that return you to the days of 2nd edition (1st edition has also a good combat system but with infinite AP). The Bad: The story is quite short and the guild system outside of the storyline (which doesn't exist anymore outside of the storyline) is quite boring. Report this game Great game. Random level events, something to do with every level. Multiple ways to level. Great colors and designs. Are some grinding beats for the leveling items (by far the best aspect of the game), but nothing so bad that it ends for the whole game.NIAID notes a substantial increase in the number of late stage Tbc's and progressive cancer cases that are resistant to first-line therapies. There are no approved second line therapies. These data suggest that existing treatments are failing in a significant subset of individuals with DS-TB with an urgent need for more treatments for these failing patients. Previously, we identified novel treatment strategies and preliminary data on the efficacy of combinations of first- line TB drugs and these'super' multi-drug-resistant (MDR)-TB treatments provide the basis for a new NIAID AIM. A pre-IND meeting has been organized to discuss the IND-ability of Super MDR-TB. Only 2 of 60 compounds met the technical criteria for IND in the open field trials and just one compound progressed to the screen. The first compound, BP109 targets ToxR and will be the subject of future 2PD**
